THE IIIEE | LUND UNIVERSITY

The IIIEE Strategy 2025-2029

OUR VISION -WHAT WE WANT TO ACHIEVE

A future in which the IIIEE has accelerated the transitions to climate-neutral and resource-efficient economies.

OUR MISSION - HOW OUR WORK CONTRIBUTES TO OUR VISION

Our mission is to produce and share actionable knowledge for sound decision making at all levels, from the local to the global, and to educate future leaders and change agents, to enable transitions to climate-neutral and resource-efficient economies.

OUR FOCUS AND OBJECTIVES - WHAT WE DO AND WHERE WE CONCENTRATE OUR EFFORTS

We are committed to produce rigorous, impactful, and solution-oriented interdisciplinary research, contributing to accelerating and navigating the transition to climate-neutral and resource-efficient economies. The research focuses on Business Management and Practice, Consumption Governance, Urban Transformation, and Policy Interventions.

We recruit students from all over the world with various disciplinary backgrounds. With a dual focus on management and policy, we educate future leaders and change agents with the knowledge, skills, and networks to drive sustainability transitions.

In order to facilitate excellent research and outstanding education we will:

- support our core activities with effective systems and professional management, administration, and communication that we all contribute to.
- continuously improve our processes to capitalize on funding opportunities.
- create a working environment that is able to attract excellent international students and staff and provides opportunities for all to grow during their journey.

OUR VALUES - WHAT WE STAND FOR

We uphold the values of Lund University and especially emphasize the three core values of the IIIEE:

- we have the ***courage*** to raise new questions and pursue new paths.
- we actively seek the ***inclusion*** of diverse people, ideas, and perspectives in our research and education.
- we conduct our research with ***integrity*** so that it is possible for others trust our methods and the results produced.

HOW WE WORK

- We identify and incorporate pathways to impact from the beginning.
- We see research and education as mutually reinforcing.
- We enable close interaction between students, staff, and alumni to create a unique community and strong networks of value to all of us.
- We are passionate about interdisciplinarity, multiculturalism, and diverse perspectives as the foundation of our work.
- We proactively collaborate with multiple actors from industry, society and academia.
- We strive for a healthy work-life balance and foster a friendly and supportive community.

About the IIIEE

The International Institute of Industrial Environmental Economics (IIIIEE) is an international and interdisciplinary centre within Lund University. We are a unique centre and node for interdisciplinary research and education within Lund University. We were established by the Swedish Parliament as a response to the urgent need for many organizations to understand, develop and implement preventive approaches to environmental problems.

At the IIIIEE, we work at the nexus of economy, industry and the environment and believe that a profound industrial transformation is a precondition for a sustainable future. We also believe that a transformation towards sustainability would require strategically focused governance and management structures, policy instruments, business models, visions and scenarios.

The research and education at the IIIIEE is interdisciplinary. The IIIIEE's education and research synthesize insights from economic theory and practice, natural sciences, engineering and political science, as well as organisational, legal and behavioural studies. The IIIIEE faculty members have backgrounds in diverse disciplines. We also focus on collaboration and actively engage our partners via collaborative research projects, case study projects, lecture series, interactive seminars and workshops.
