

25 Years of Education and Research | EST. 1994

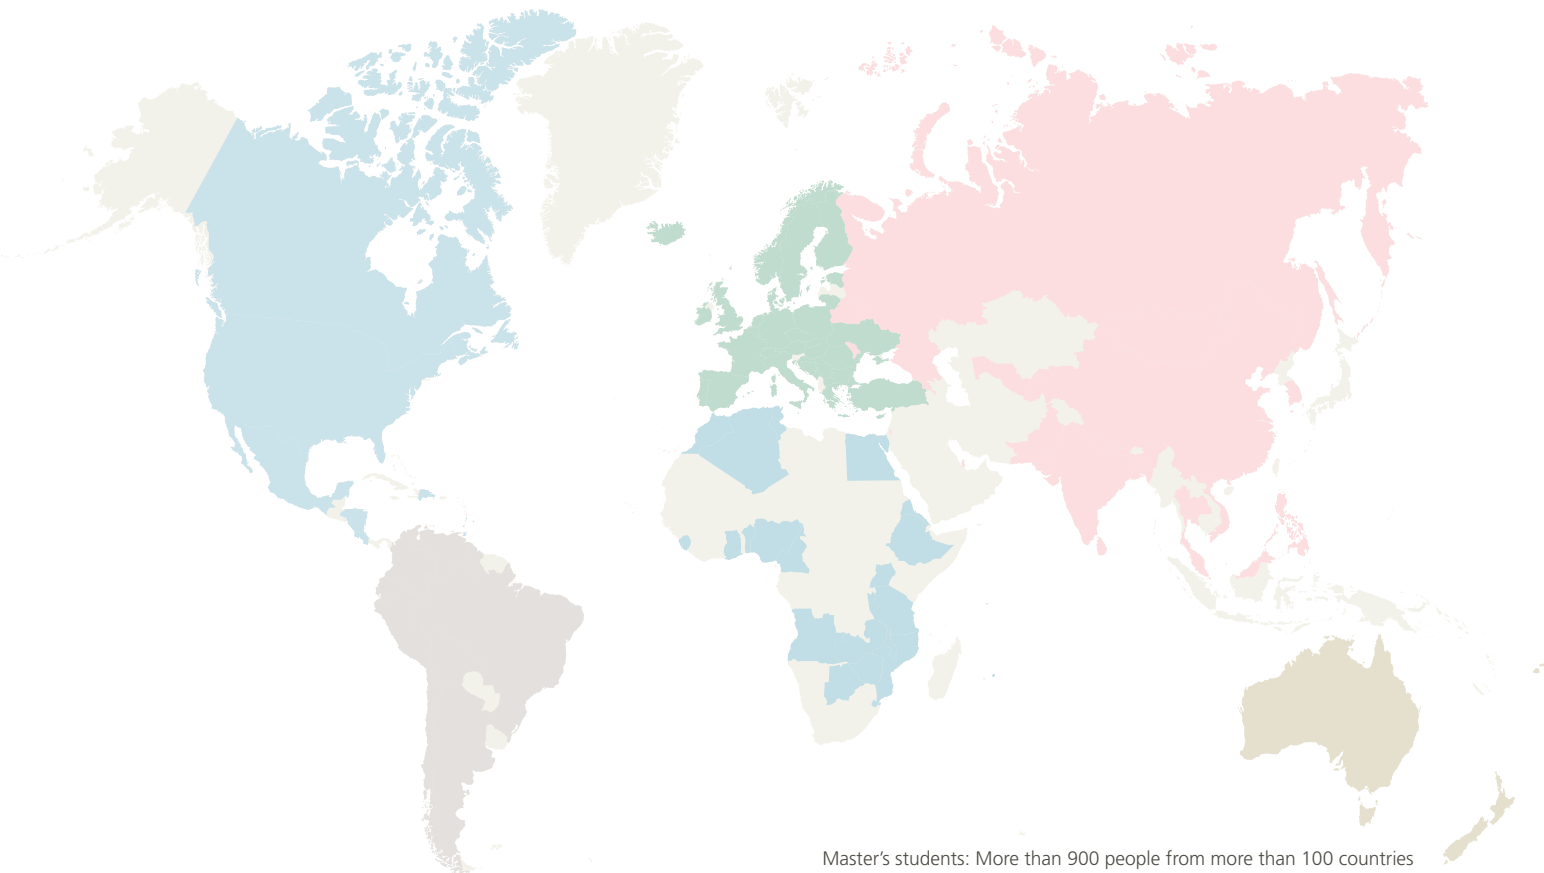

THE INTERNATIONAL INSTITUTE FOR INDUSTRIAL ENVIRONMENTAL ECONOMICS (IIIEE) | LUND UNIVERSITY

25 Years of Education and Research at the IIIEE

The **International Institute for Industrial Environmental Economics** was founded in 1994 with the official inauguration by His Majesty the King of Sweden Carl XVI Gustaf in 1995. The Institute was established by the Swedish Parliament as a response to the urgent need for many organizations to understand, develop and implement preventive approaches to environmental problems. 25 years have passed and the institute is more needed than ever before.

It is 2019, and systematic changes from the present unsustainable systems of consumption and production are urgently needed. Today, the Institute is an innovative and creative arena for interdisciplinary education and research with the purpose to advance knowledge on how to catalyze the transition to low-carbon and resource efficient economies.

Master's students: More than 900 people from more than 100 countries

Education

All education at the IIIEE is designed to equip students with the knowledge, skills and personal qualities needed to advance strategies for sustainable solutions. We are proud of our students who are invaluable ambassadors and agents of change.

Master's students:

More than 900 people from more than 100 countries

Alumni network platform:

750 registered alumni representing more than 90 nations

Massive Open Online Courses:

55,000 registered participants and 250,000 visitors (since 2015)

Research

All research at the IIIEE is interdisciplinary and collaborative, focusing on advancing sustainable solutions. We advance knowledge on how to catalyse the transition to low-carbon and resource efficient economies across four themes of governance and management:

- International and national policy intervention
- Urban governance and experimentation
- Business management and practice
- Consumption governance and lifestyles

Publications since the start in 1994:

1087 publications in total, of which 329 are peer reviewed articles in scientific journals

34 PhD theses
